PROFILE

UX/UI Designer with **5+ years of experience** designing web and SaaS digital products. I specialize in creating interfaces that feel effortless to use — visually clean, logically structured, and built around how real users think. From early wireframes to polished Figma handoffs, I bring clarity to complex problems. Currently based in Tashkent, open to remote and international opportunities.

EXPERIENCE

UX/UI Designer

Oct 2020 – Present

AIF Agency · Full-time · Tashkent, Uzbekistan

- Design end-to-end UI for web and SaaS products, from wireframes through high-fidelity Figma files
- Translate complex business requirements into clear user flows and intuitive interface patterns
- Build and maintain design systems and component libraries to ensure cross-product consistency
- Collaborate closely with developers during handoff to ensure pixel-accurate implementation
- Work directly with clients to gather requirements and iterate quickly on feedback

Freelance UI Designer

May 2022 – Present

Upwork · Remote

- Deliver web and product UI design projects independently, from brief to final handoff
- Manage full client communication, scope, timelines, and design iterations autonomously
- Design for diverse industries including SaaS, landing pages, and web applications
- Produce production-ready, responsive layouts optimised for both desktop and mobile
